BAGICHI AGRO

# Introduction

## Of BAGICHI AGRO

At Bagichi Agro, we are dedicated to reaching farmers and farming communities to enhance agricultural output by reducing input costs (fertilizers and pesticides) using naturally available products without compromising farm productivity.

**85%**

**Importance of the  
Agricultural Sector**

Our primary aim is to assist farmers with a multidisciplinary team and a universal approach. We are dedicated to working with farmers in South Africa, leveraging our expertise to help them achieve their agricultural goals. Our comprehensive support includes providing guidance, innovative products, and practical solutions tailored to the unique needs of each farm.

BAGICHI AGRO

# Organic fertilizers

## SERVICES WE PROVIDE

### Nano biofertilizers

Nano biofertilizers are eco-friendly, nanoparticle-based fertilizers that enhance plant growth and soil health by delivering nutrients more efficiently.

### Biopesticide / fungicide

A biopesticide / fungicide is a natural substance derived from organisms such as plants, bacteria, or minerals that is used to control pests and fungal diseases in crops.

BAGICHI AGRO

# Vermicompost and Granules

Vermicompost is an organic fertilizer produced through the decomposition of organic material by earthworms. This process, known as vermicomposting, transforms waste into a nutrient-rich soil amendment that enhances soil fertility and promotes healthy plant growth.

# Gypsum

Gypsum is a naturally occurring mineral composed of calcium sulfate dihydrate. It is widely used in agriculture and horticulture as a soil amendment to improve soil structure and enhance plant growth.

BAGICHI AGRO

# Straight Micronutrient Fertilizers

Straight Micronutrient Fertilizers are formulations containing essential micronutrients required for plant growth and development. These fertilizers provide targeted nutrition to address specific micronutrient deficiencies in soils and plants.

# Crop Special Consortia

Crop Special Consortia are specialized formulations containing beneficial microorganisms, organic matter, and nutrients designed to enhance soil fertility, plant growth, and crop yield. These consortia promote sustainable agricultural practices by improving soil health and nutrient availability.

BAGICHI AGRO

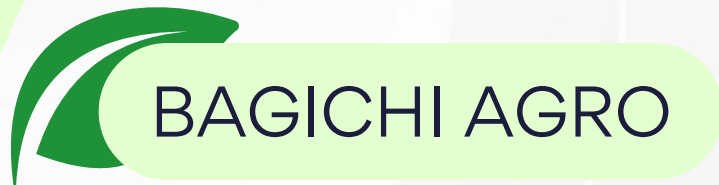

# Micronutrient Liquids

Micronutrient Liquids are concentrated formulations containing essential micronutrients required for optimal plant growth and development. These liquids are designed for easy application and rapid nutrient absorption by plants.

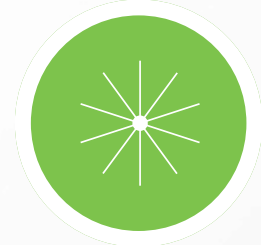

# Granules

Granules are a type of organic fertilizer created by processing organic material into small, easy-to-apply particles. This form of fertilizer is designed for uniform distribution and slow nutrient release, ensuring consistent nourishment for plants. Granules enhance soil structure, improve water retention, and promote sustainable plant growth.

BAGICHI AGRO

# Technological

## Advancements in Agriculture

Biotechnology

Robotics

Sensors and Monitoring

Satellite and Drone Mapping

Technological advancements in agriculture, such as precision farming, biotechnology, robotics, and artificial intelligence, are transforming farming practices and enhancing productivity, sustainability and food security globally.

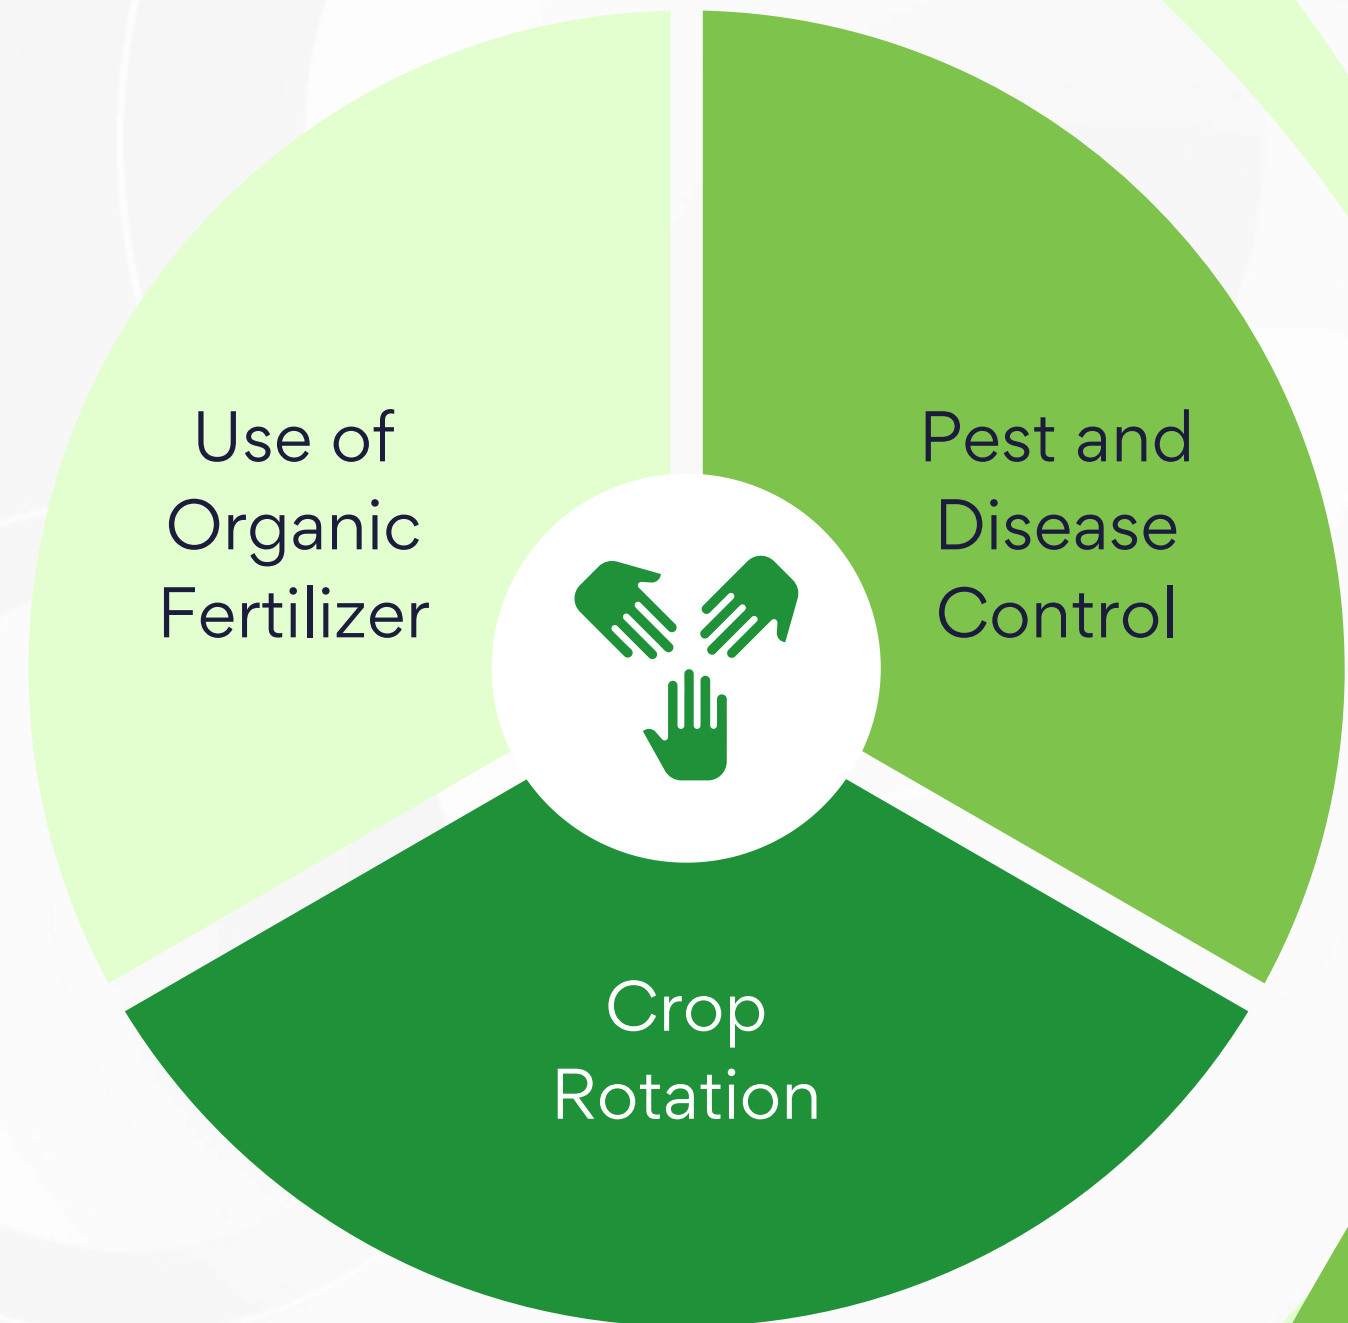

BAGICHI AGRO

# Organic Farming

## Methods and Benefits

Organic farming methods focus on sustainable practices like crop rotation, composting, and natural pest control, avoiding synthetic chemicals and genetically modified organisms. Benefits include healthier soils, reduced environmental impact, improved biodiversity, and safer, more nutritious food options for consumers.

- ✓ Use of Organic Fertilizer
- ✓ Crop Rotation
- ✓ Pest and Disease Control

BAGICHI AGRO

## ABOUT US

Bagichi Agro offers premium manure and fertilizers to boost crop yields and promote sustainable farming. We are committed to improving soil health and supporting farmers with high-quality products and innovative solutions.

## VISION

At Bagichi Agro, we aim to revolutionize agriculture by providing sustainable, high-quality manure and fertilizers, promoting eco-friendly practices for long-term success and food security.

## MISSION

Our mission is to support farmers with superior manure and fertilizers, enhancing soil fertility and crop productivity. We are committed to educating farmers, fostering innovation and ensuring sustainable farming for future generations.

## QUALITY

At Bagichi Agro, quality is our cornerstone. We produce and source manure and fertilizers to the highest standards, rigorously testing them to meet crop nutritional needs and improve soil health. We invest in research and development to provide effective, eco-friendly solutions.

BAGICHI AGRO

# Thank You

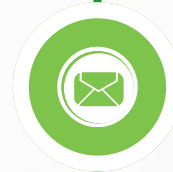

For your attention

Bagichi Agro is dedicated to advancing sustainable agriculture through our commitment to producing high-quality organic farming products.
